

**Catenary voltage:**

- ① ... 15 KV AC (16,66 Hz)
- ② ... 25 KV AC (50 Hz)
- ③ ... 750 V DC
- ④ ... 1,5 KV DC
- ⑤ ... 3 KV DC
- ne ... non electrified
- pe ... partly electrified

**Intermodal freight code:**

- Ⓜ ... P/C 70/400
- Ⓟ ... P/C 78/402
- Ⓡ ... P/C 80/410
- Ⓦ ... P/C 47/360
- Ⓧ ... P/C 57/381
- Ⓨ ... P/C 67/391

\* ... information available at OSS contact point

The displayed path/train parameters, times and charges may differ in reality, as all calculated figures are average figures based on standard trains. The displayed train length comprises traction unit(s) in some Infrastructure Managers; in others, it doesn't. In border stations/on border sections, special operational regulations have to be applied. Please consult the IMs' Network Statements in any case!

### EUROPTIRAILS

- Supports international train management
- Delivers real-time train data
- A reporting function enables international quality analysis

Free temporary test user accounts for RUs and IMs who run international rail services available at:  
[support.europtirails@railneteuropa.info](mailto:support.europtirails@railneteuropa.info)

### EICIS

- Infrastructure charging information
- Calculates the prices for the use of international train paths as well as station charges and shunting fees
- within seconds, 24 hours a day
- free of charge.

Free access for RUs and IMs/ABs involved in the international rail business available at:  
[support.eicis@railneteuropa.info](mailto:support.eicis@railneteuropa.info)

### PATHFINDER

- International train path management
- Path request coordination tool for Applicants and IMs
- Optimises international train path coordination
- Ensures that path requests and offers are harmonised by all involved parties
- Also supports path requests for the running timetable since 2009.

Free PATHFINDER accounts are available for RNE Members and licensed customers at: [support.pathfinder@railneteuropa.info](mailto:support.pathfinder@railneteuropa.info)
